# **Efficiency Curve (efficiency vs output load)**

# **Derating Curve (output load vs TEMP.)**

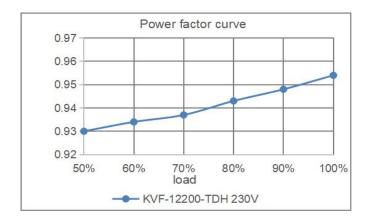

- 1. To extend their life, please refer to the Derating Curve and derate according to the temperature.
- 2. Please note that the rise in temperature of LED fixtures over a long period of time will cause their power to rise.

  Therefore, we recommend the power supply to reserve a certain amount of load to avoid overloading.

## **Dimming Operation and Connecting Diagram**

## TRIAC/Phase cut dimming

- 1. The Pulse-Width Modulation (PWM) of output voltage can be adjusted through input terminal of the AC phase line(L) by connection a phase /Triac dimmer or lighting system.
- 2. Working with leading edge and trailing edge, TRIAC dimmers.
- 3. Min. loading is about 10%.
- 4. Please try to use dimmers with power at least 1.5 times as the output power of the driver.
